Work Experience

Caps Collective

2019 - Present

Co-founded [Caps Collective](#), managing a part-time team creating open-source games and software

Led development and design on the 3D city builder [Fantasy Town Regional Manager](#), featured in [Kotaku AU's Top 10 Australian Games](#) and nominated for the [Australian Game Development Awards](#) for Excellence In Emerging Games

Released the short-form narrative game [Have You Eaten Yet?](#) in collaboration with [4A Digital](#)

Big Sand

2025 - Present

Unreal development for [Big Sand](#), a virtual band utilising audio and motion capture technology for their performances

Developed networking solutions to connect audio, visual, and OSC control devices across the venue

Lead developer on the Big Sand video game, utilising Unreal Metasounds to create responsive and dynamic audio

NSW Department of Primary Industries

2024 - 2025

Contracted senior developer for [myFarmPlanner](#), a form and mapping tool for primary producers, from beta to release

The tool utilises ArcGIS with a legislation API for interactive drawing and realtime feedback

McKinsey Build / Quantum Black

2021 - 2024

Worked as a software developer in cross functional teams of engineers, designers, and product owners to deliver market ready solutions in 3-6 months

Deployed production code in multiple industries such as finance, insurance, agriculture, and retail

Led development and client implementation of the React component library for the Quantum Black Design System

Hypothesis

2020 - 2021

Built web form and mapping tool to simplify the property development process for farmers by codifying government legislation

Developed team agility analytics data capture and visualisation tools with Highcharts and D3

Impulse Screen Media

2016 - 2018

Full-stack software engineer for an advertising analytics platform

Created custom video editing software built on FFmpeg for ad collection, enabling the company to outsource the process

On-site installation and configuration of servers for remote control

Education

Bachelor of Software Engineering

2016 - 2021

Graduated with first class honours from the University of Technology Sydney

Thesis on agile project management in user experience led projects

President of the UTS Programmers Society 2019-2020

Head of Publications for the UTS Engineering Society 2018

WiseTech Global Senior Programming Prize 2018 for C Fundamentals

Skills

Game Engines

Design and development of games, live production, and logistics software across multiple engines

Unreal

Unity

Godot

Experience Design

Creation of user interfaces for games and web, with a focus on accessibility and responsiveness

Development and usage of design systems, with branding and marketing alignment of white-labeled products

Design discovery processes such as persona creation, customer research, and user story mapping

Figma

Miro

Affinity Design

Agile Project Management

Facilitation of agile ceremonies such as retros, backlog refinement, and stand-ups

Administration and configuration of project management tools

Jira

Azure DevOps

Github

Full Stack Engineering

End to end development of solutions such as web apps, APIs, and internal tooling

Production cloud deployment with AWS and Azure

Typescript

C#

Python

Databases

Analytics and Data Visualisation

Creation of data analytics dashboards for internal and external use

Building bespoke charts and mapping software using spatial data APIs

PowerBI

D3

Highcharts

ArcGIS
